7/3/20

Interpretation: This is a normal Holter recording. The cut off for large breed dogs is 50 VPCs/24 hours. The presence of pairs or triplets with less than 30 VE is still considered normal. If pairs or triplets are present with 30 to 50 VE then this is considered equivocal. The presence of 100-2000 VE singles in 24 hours is considered mild increase.

COMPANY

Conclusions: This is a normal Holter recording. No cardiac recommendations based on this Holter alone. Recheck Holter in 8-10 months.

Sincerely yours,
